

As a subscriber to XM Satellite Radio for well over a year now I must say that I've finally found a reason to turn my radio back on! Please reject NAB's petition 04-160. I choose to pay for all of the services offered by XM Satellite Radio because no one but a satellite radio service can give me (and the millions of other subscribers) the quality of sound, the music, sports, news, weather, and traffic reports!

When you think about it, the public deserves what satellite radio offers! What we don't deserve, is is a broadcast board telling us what we can listen to and who is given the right to broadcast it!

PLEASE REJECT NAB'S PETETION #04-160. Thank you for listening, Jim Glymph.
